COMPENSATION

DOE

Benefits: Medical, dental, vision, 401K, paid vacation, sick leave, Cobra, and profit-sharing

JOB OVERVIEW

Project Leads lead the specification, design, engineering, and commissioning of CCI Solutions' design build projects. Utilizing tools such as AutoCAD, Sketchup, Ease, among many others, our Project Leads drive the design of the audio, video, and lighting systems that empower our clients to connect with their audience and meet their goals. In addition to having system design and engineering capabilities, Project Leads serve as our main project management liaison with our clients, architects, engineers, and contractors, working closely with each to ensure our system designs are well-implemented, according to each client's needs and vision.

JOB RESPONSIBILITIES INCLUDE

- Project Management –oversight and communication of all aspects of the project with client, architects, engineers, and contractors
- Lead Design - lead the design and engineering of audio, video, and lighting systems
- Collaborate on Integration - on-site and remotely, working closely with Installation Team to ensure systems are installed as designed
- Commissioning - Lead and provide commissioning/programming of audio, video and lighting systems
- Quality Control - Insure systems meet or exceed industry and CCI Solutions standards
- Project Administration –oversee all administrative functions related to the project
- Training –Provide training for clients and their systems, either directly or utilizing manufacturer trainers
- Sales Support – Assist Church Relations Team in winning projects as needed/available

QUALIFICATIONS

- Self-motivated
- Proficient in AutoCAD, Sketchup, D-Tools and other design software
- CTS Certification is preferred, CTS Design is highly desirable
- Current and knowledgeable regarding products and methods in the Pro AV industry
- Excellent verbal and written communication skills
- Ability to relate to technical and non-technically minded people
- Strong interpersonal and analytical skills
- Proficient in DMX lighting control protocols, methods and systems
- Understand various video transmission standards and protocols for analog and digital video signal transmission.
- Ability to learn, adjust and operate various digital signal processors, digital mixers and other digital devices used in sound, video and lighting systems
- Ability to train church staff and volunteers to operate audio, video, and lighting system components
- Ability to operate and use ladders, man-lifts and other devices to work at heights up to 40' or more
- Proficient with power tools and technical tools used in installation work
- Valid driver's license and ability to obtain a Commercial Driver's license if required
- Familiarity with Houses of Worship and how audio, video, lighting and creative arts impact churches
- Proficient in technical installation and the programming of sound, video and lighting systems
- Some Travel required, at times may be heavy
