

Web Platform
Perfect Video Streaming -
Even Through Internet Loss

Put an End to Buffering Wheels! Resilient Streaming to Any Device

Living As One is excited to announce the Web Platform, a highly resilient system for online video streaming that ensures reliable, high-quality video transmission regardless of internet connection stability. Take advantage of stress-free, consistently high-quality streaming powered by Living As One!

WINNER

“Throughout our testing, we’ve seen viewers watching on smart-TV’s, mobile phones, and all sorts of devices. It’s pretty incredible how simple it is to reach everyone. We get just one embed code, schedule each service, and it works automatically without us having to touch anything.”

LA1 has been so reliable for our Sunday live and sim-live messages that we are confidently using it to stream back our youth sessions from the beach, so the parents can see what their children are experiencing.”

– Daniel Poston, IT Director, Newspring Church

4k HDMI and SDI
Stream at up to 4k UHD resolution through HDMI and SDI inputs.

End-To-End Video Resiliency
The platform can overcome internet bottlenecks with zero video loss for uninterrupted playback.

Live/DVR/Simulated Playback
Pause and play live video as needed. Play synchronized content later through simulated live playback.

Simple Operation
The platform is easy even for volunteers. Start streaming and playback with just a few clicks.

Weekend Phone Support
Our support engineers are available if your team needs help, even on Sunday mornings.

Priced for Non-Profits
Our hardware cost defies market expectations. We keep it low to accomplish a common mission.

Also streams high-quality video to social platforms!

“Before we switched to Living As One, every single week we were having buffering issues, and the stream would drop out. One week our senior pastor was trying to watch from out of town, and he had such a terrible experience. That week we changed our church online streaming to Living As One and haven’t looked back. LA1 has been a world class experience for the online community, and they even were commenting that first week on how much better the quality was - it was crazy!”

– Alex Cvitanovic, Production Director, Church of the King

CHURCH
OF THE KING

“Living As One has been a game-changer for Churchome. It sounds funny, but we can literally sleep on Saturday night knowing that things are going to work without a hitch for our Sunday services. With the Web Platform, we have been able to venture into the live streaming space knowing that we will not have any chance of failure.

It’s easy to setup live stream events with custom links and it’s not laborious management process for our production team. We are excited to do way more with live streaming on our newly launched Churchome Global mobile app now that we have an incredibly reliable and stable platform to partner with. It’s been an AMAZING experience and partnership for us.”

– Justin Isenhart, Director of Support, Churchome

Always the Best Quality

Along with providing full resiliency, the Web Platform includes cloud transcoding, conserving bandwidth at the broadcast site. On the audience side, smooth streaming is reinforced by adaptive bitrate streaming (ABS), which dynamically selects a bitrate depending on available bandwidth and processing power.
