Faith Assembly

Pasco, WA

It's the place in your home that serves as the welcome area for guests and new friends. It's the first step, and it's often your only chance to make guests feel comfortable enough to return. That's exactly how the entry environments have been designed at Faith.

The Sunday morning worship services are "front door" environments inviting guests to come back. Each area of ministry also has its own front door. These environments are where most people will experience Faith Assembly for the first time and they serve as the perfect place to introduce newcomers to life at Faith Assembly.

CCI Solutions has played a vital role in this process helping Faith Assembly reach their community with the very best in theatrical lighting, sound and video.
